Zatopek Consulting TAILORED TECH | LASTING RESULTS

Wrestling with inefficient processes? Stuck with unreliable solutions? Burning resources and sanity on manual reporting? We get it. Your SAP solution shouldn't be a headache. You want to lead your industry, not be held back by outdated tech. We build stronger businesses with SAP Treasury and Finance solutions that work—customized to your needs & delivered with speed.

We've led some of the largest SAP S/4HANA treasury transformations, delivering seamless automation, real-time cash visibility, and bulletproof compliance. ZCustody—our boldest solution yet—tailored for pension funds, asset managers, and banks, elevates fund administration with smart SAP BTP, streamlining workflows and cutting manual effort.

With 17+ years of expertise, 100+ projects across 20 countries, and a clean-core SAP approach, we don't just implement stuff—we future-proof your business. And we love it. Our 65+ consultants specialise in delivering complex, end-to-end solutions that blend standard SAP functionality with smart enhancements.

You can find our SAP-certified tools in the SAP Store. Let's make your treasury work for you, not against you.

COMPANY
DESCRIPTION

AFM SyncCore

AFM SyncCore

AFM SyncCore – Seamless Integration Between SAP and AFM

AFM SyncCore is a powerful, modular integration framework developed by cooperation between Zatopek Consulting and Alstanet to connect SAP systems with the AFM (Alstanet Facility Management) platform.

Designed as a single integration point, AFM SyncCore handles all data orchestration, connectivity, and authentication, enabling reliable and scalable communication between enterprise systems.

Whether you're syncing business entities or employee records, AFM SyncCore provides a centralized, extensible, and secure foundation to simplify and streamline your data flows.

Key Highlights:

- Central integration hub for SAP–AFM communication
- Secure, configurable, and version-managed
- Scalable with plug-in modules for extended capabilities
- AFM SyncCore fully supports:
 - SAP ERP (ECC)
 - SAP S/4HANA – Public Cloud, Private Cloud, and On-Premise deployments. This ensures flexible deployment and compatibility with your current and future SAP landscape.

Your bridge between facility management and enterprise operations.

AFM SyncCore

Key Capabilities

Basic Features

- Replicates key cross-application master data from SAP to AFM
- Enables consistent data foundation across systems
- Core system contains centralized basic configuration

Supported Data Entities

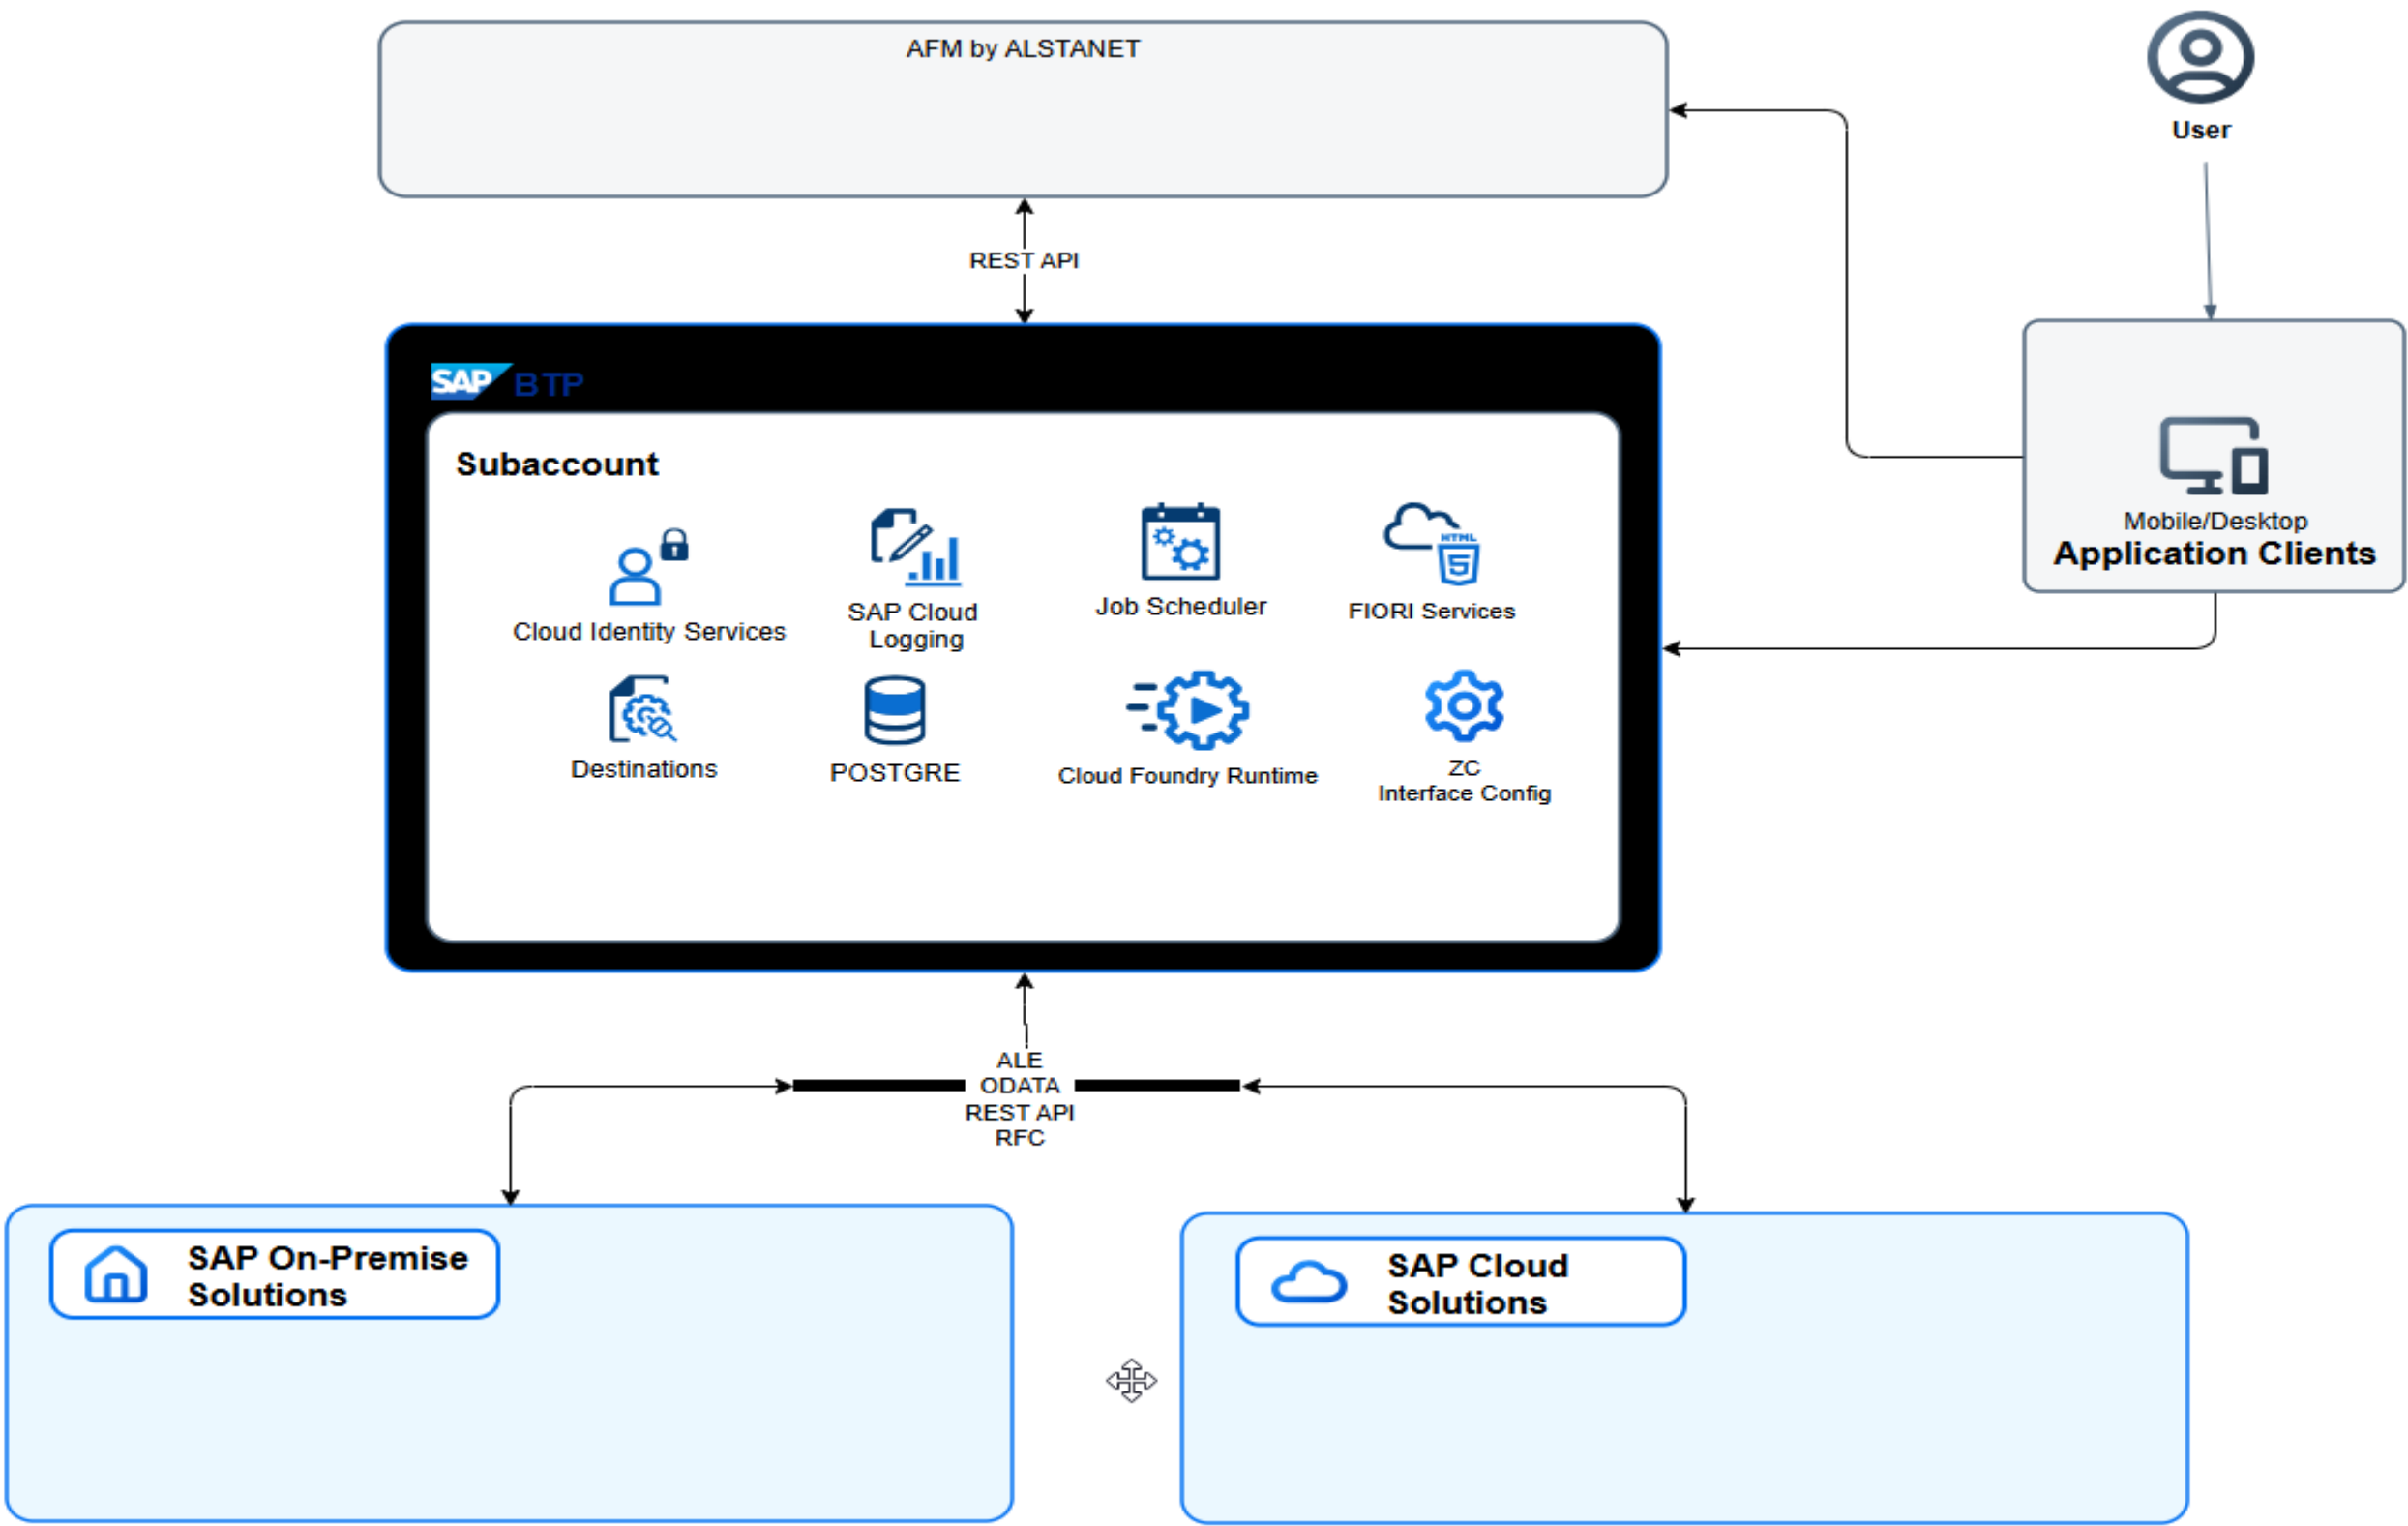

- Subjects – Business Partner (BP), Vendors, Customers
- Chart of Accounts
- VAT Codes
- Cost Centers – With validity periods
- Employees – Sourced from SAP HR(HCM) or SuccessFactors

Plugin Manager

- Registers and monitors all plug-in components (e.g. SyncFA, SyncHR)
- Tracks versioning and active/inactive status of sub-modules

Flexible Integration Methods

- ALE / IDoc Interfaces – asynchronous data exchange
- SAP Data Replication Framework (DRF) – Optimized for real-time or scheduled updates
- ODATA Interfaces – lightweight APIs for real-time integration
- REST APIs – Used for custom or lightweight service calls
- RFC (Remote Function Calls) – For synchronous and direct SAP function module integration
